

HYDRAULIC AND INDUSTRIAL FILTRATION

*Our World,
Our Compass...*

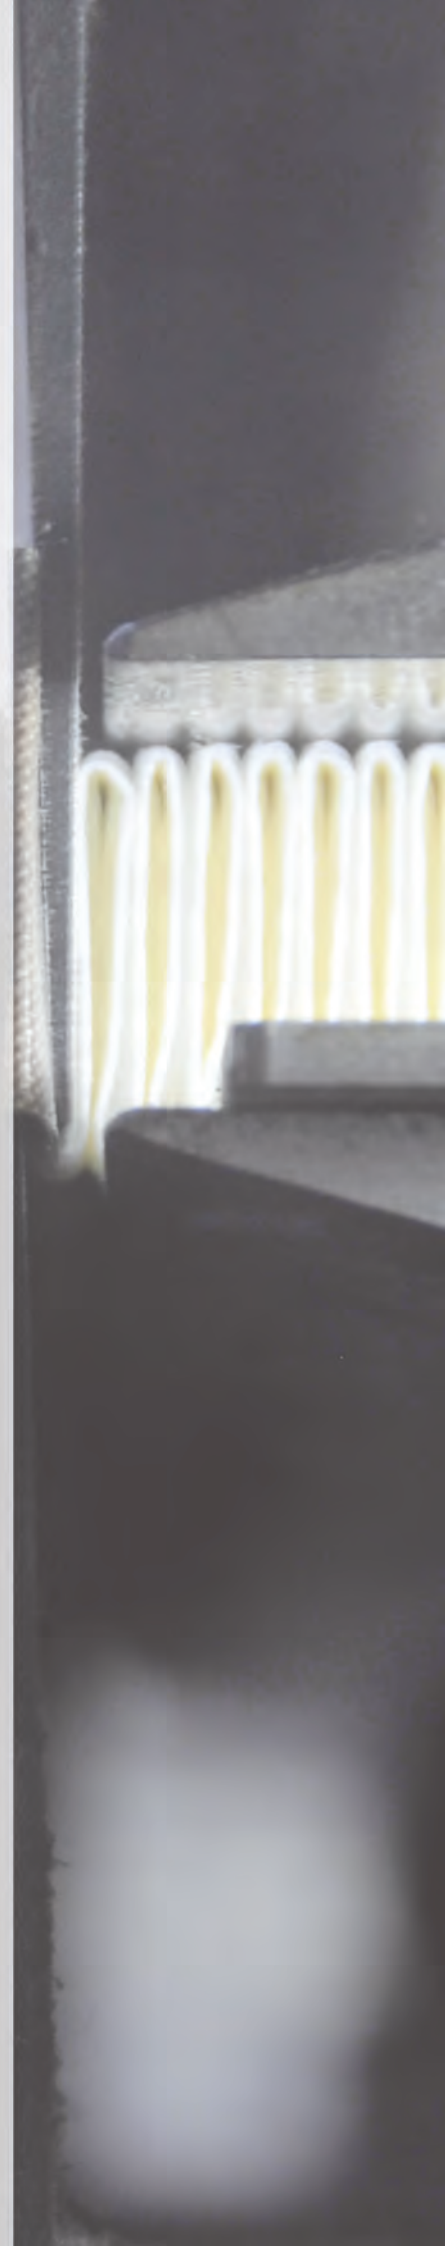

APPLICATIONS

Every day our filters and our filter elements efficiently satisfy the filtration requirements of countless applications all over the world.

Wherever a hydraulic or lubrication system is operating, on fixed or mobile applications, FILTREC filters and filter elements ensure the correct oil cleanliness to maintain the system's efficiency and reliability.

Wherever industrial fluids or process filtration is required, FILTREC filters and filter elements effectively solve the most varied of requirements.

FILTER ELEMENTS

The FILTREC "CROSS NAVIGATOR" database has been specifically developed to easily find our part number corresponding to other filter manufacturers codes.

Each element is carefully designed to ensure full dimensional compatibility and meet or exceed the filtration performance of the original.

We produce a huge range of quality filter elements to replace the majority of filter brands.

All testing is performed in our laboratory strictly following the latest ISO specifications.

HYDRAULIC FILTERS

Our range of filter assemblies covers suction, pressure and return applications, to effectively solve contamination control requirements of hydraulic systems, is continuously growing and evolving.

Our technicians are available to develop custom tailored solutions, side by side with our customers, to meet their unique requirements.

The performance of our assemblies is validated by vigorous laboratory tests performed according to the most recent ISO specifications.

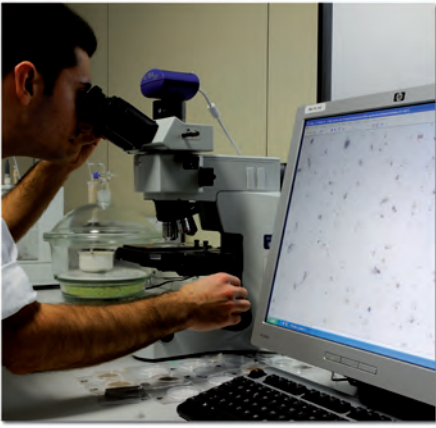

INDUSTRIAL AND PROCESS FILTERS

A range of standard models satisfies the most common filtration requirements for lubrication systems, fuel transfer and industrial water treatment.

This standard range includes simple, duplex and backwashing filters.

Our experienced engineers can support our customers needs developing bespoke solutions for a number of various filtration applications, such as oil, gas, process and coalescent filtration.

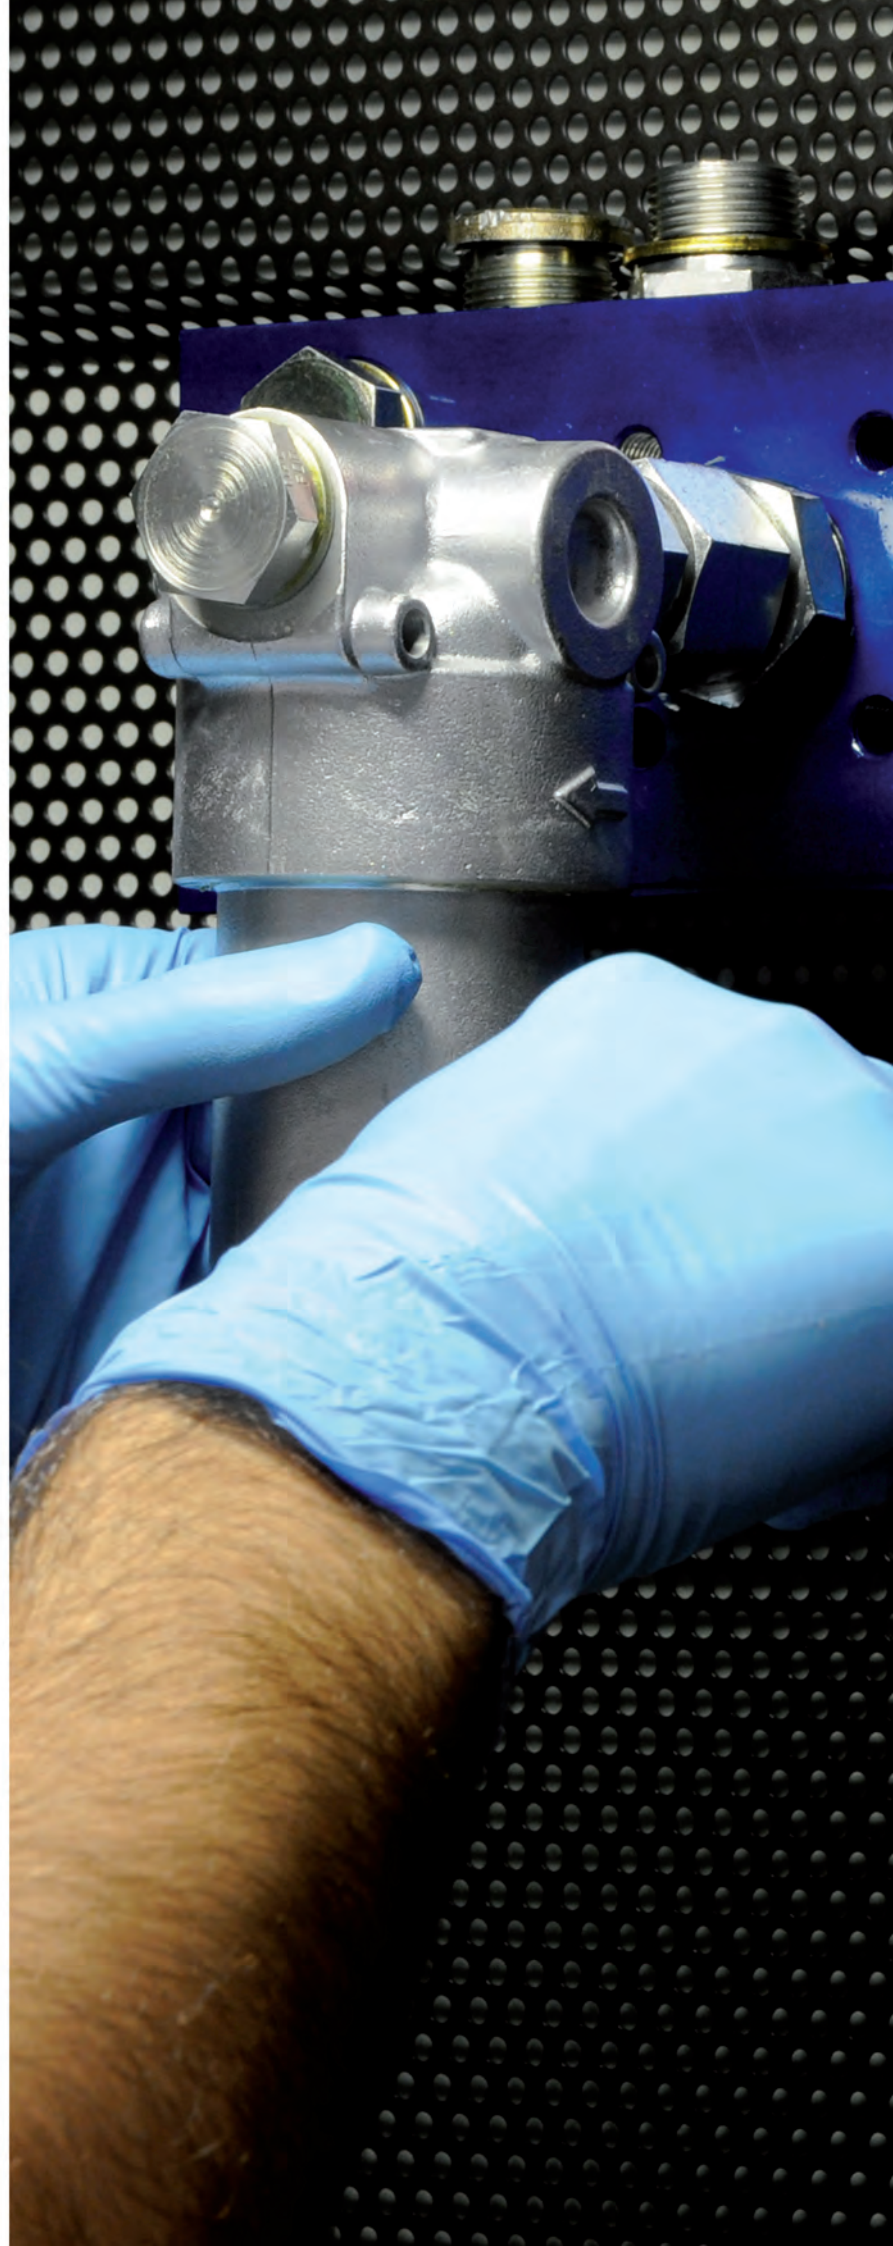

TECHNICAL SUPPORT

Our laboratory has a key role within our organization, fully equipped with all the test rigs required to meet the latest international specifications. Run by a team of experienced and enthusiastic engineers that are also active members of the ISO filtration committee.

Our team test and validate our products and support our customers with analysis service.

Although their main focus is developing and testing new ideas to always remain a step ahead with our media and filter performance, allowing us to convert our customers' requirements into innovative solutions.

ABOUT US

Since our inception, FILTRATION EFFICIENCY has been our target.

We don't mean just high performance filters, but the whole aspect of our customers' requirements for reliable and efficient contamination control:

- superior quality filter media
- leading edge design to international standards
- laboratory and field testing
- intimate dialogue with our customers
- moving forward through research and innovation into the future
- state of the art production equipment
- qualified and experienced Customer service personnel

To that end we have built up a team of qualified, enthusiast professionals, striving to forge closer working relationships with our customers. "Together working towards a common goal".

simply say FILTRAC

GLOBAL PRESENCE

Headquartered in Italy, our Company was founded in 1991.

Since then we have developed relationships with customers all over the world.

Our branches in strategic areas and sole distributors in all major industrial economies allow us to work closely with our valued customers worldwide.

The contact details of our strategic locations and our global partners are available from our website.

WE MOVE IN HARMONY WITH THE WORLD!

ALWAYS UP TO DATE

We like to keep our customers informed about our continual advancements.

Our web site is the public place where you can find the latest information concerning our products and our Company, at your leisure, wherever you are in the world.

Need a custom tailored solution?
Contact our Customer Service Professionals who are there to assist you in achieving a successful outcome.
